### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. 2929907.

Noting firstly that the recitation of “depilation device” and “a storage space... for accommodating a store of depilation tape” refer strictly to the intended use of the device, US’907 discloses, at Figs. 1-4, col. 3, lines 20-39, and col. 4, lines 8-38, a housing 11, 12, 13, 14 with a storage space 16, a heating device 30 comprising a “plate-shaped heating wall designed for direct co-operation with the depilation tape,” and “pressure means” 51 “opposite the heating device.” The “pressure means” 51 can be considered “arcuately shaped” brackets in either of two respects: viewed in profile, either side of each pin has an arcuate shape since it curves to a point; alternatively, since the pins press against the “heating wall,” the pressure necessarily imposes on the pin, to some extent, an arcuate shape.

### ***Allowable Subject Matter***

Claims 7-11 and 13-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-6 are allowed.

### ***Response to Arguments***

Applicant's arguments filed 11/17/08 have been fully considered but they are not persuasive. Applicant asserts that the newly recited “arcuately shaped bracket” is not disclosed or suggested by the prior art. Without reciting further structural features, however, this limitation is met by the pressure means of US’907, as discussed above. Reiterating, “pressure means” 51 are “arcuately shaped” brackets in two respects: viewed in profile, either side of each pin has an arcuate shape since it curves to a point; alternatively, since the pins press against the “heating wall,” the pressure necessarily imposes on the pin, to some extent, an arcuate shape.

***Conclusion***

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
